**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

A) Claims 1-12, drawn to a system for network to computer

interfacing classified in class 709, subclass 250.

B) Claims 13-20, drawn to a method for power conservation

classified in class 713, subclass 320.

The inventions are distinct from each other for the following reasons:

Inventions A and B, are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention A has separate utility for loading data in a communication device, which is separately usable with or without invention B, which has utility for saving power in a communication device. See § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
